

American Funds T2030;R-3

As of: 9/30/2016

Ticker: RCETX

FUND INVESTMENT OBJECTIVE

The Fund seeks to provide for investors that plan to retire in 2030. Depending on its proximity to its target date, the Fund will seek to achieve the following: growth, income and conservation of capital. Each Fund will attempt to achieve its investment objectives by investing in a mix of American Funds.

AVERAGE ANNUAL TOTAL RETURN

These figures reflect past performance and are not an indication of future performance. The investment return and unit/share value will fluctuate over time so that an investment may be worth more or less than the sum of your purchase payments. Current performance may be lower or higher than the performance figures quoted. Performance current to the most recent month-end may be reviewed by calling 800-421-4225. Average annual returns assume a steady compounded rate of return. All distributions are assumed to be reinvested. It is not the fund's year-by-year results, which actually varied over the periods shown.

Prices of equity securities change in response to many factors, including the company's earnings, net asset values, economic conditions, investor perceptions, and liquidity. Bond prices change in response to many factors, including market interest rates, inflation, the credit worthiness of the issuer, liquidity, and investor perception. Investments in bond funds are not guaranteed, and may lose value at any time. Target date funds are not guaranteed to reach a certain value by their target date, and may decline in value at any time.

To deter market-timing or other disruptive trading in fund shares, some funds have a fee on a redemption of shares recently purchased.

The prospectus contains important information about the mutual fund's features, risk, policies, charges, expenses, and investment objectives, which you should review and consider carefully along with your own financial circumstances before investing. For this and other information about any mutual fund investment please obtain a prospectus and read it carefully before you invest. Investment return and principal value will fluctuate with changes in market conditions such that shares may be worth more or less than original cost when redeemed. The returns of the mutual fund do not reflect any plan or contract charges or expenses. If these were deducted, the returns would be lower. If applicable, plan sponsors may be able to choose a different share class if certain criteria are met, in which case charges and performance will differ.

Prospectuses for the mutual fund investor options in your plan are available by calling the Participant Services Center. Please call the phone number listed on your quarterly statement.

MetLife and/or its affiliates receive fees from the mutual fund families and/or their affiliates for providing certain administrative, distribution, and/or recordkeeping services.

¹Alpha is a measure of the difference between a portfolio's actual returns and its expected returns, given its level of market risk, which is known as beta. A positive alpha indicates the portfolio has performed better than predicted, given its level of market risk(beta). A negative alpha indicates a portfolio has underperformed, given the expectations established by the fund's market risk exposure. Alpha may be useful in analyzing a manager's ability to add value on a risk adjusted basis to a portfolio's performance. ²Beta is a means of measuring the volatility of a security in comparison with the market as a whole. A beta of 1 indicates that the security's price will move with the market. A beta of more or less than 1 indicates that the security's price will be more or less volatile, respectively, than the market. ³Standard Deviation measures the performance volatility of an investment against itself - that is, how much the investment goes up or down. The larger the standard deviation, the more likely the investment may experience a return that is far more or far less than its average.
