SSgA:Clarion Real Estate

As of: 12/31/2013 Ticker: SSREX

FUND INVESTMENT OBJECTIVE

The Fund seeks to provide income and capital growth by investing primarily in publicly traded securities of real estate companies.

These figures reflect past performance and are not an indication of future performance. The investment return and unit/share value will fluctuate over time so that an investment may be worth more or less than the sum of your purchase payments. Current performance may be lower or higher than the performance figures quoted. Performance current to the most recent month-end may be reviewed by calling 800-997-7327. Average annual returns assume a steady compounded rate of return. All distributions are assumed to be reinvested. It is not the fund's year-by-year results, which actually varied over the periods shown.

General Growth Properties Inc	3.32%	
AvalonBay Communities Inc	3.09%	

Prices of equity securities change in response to many factors, including past and prospective earnings of the issuer, the value of its assets, general economic conditions, investor perceptions, and market liquidity. Sector funds may be more volatile than funds that diversify across many sectors or industries.

To deter market-timing or other disruptive trading in fund shares, some funds have a fee on a redemption of shares recently purchased.

The prospectus contains important information about the mutual fund's features, risk, policies, charges, expenses, and investment objectives, which you should review and consider carefully along with your own financial circumstances before investing. The returns of the mutual fund do not reflect any plan or contract charges or expenses. If these were deducted, the returns would be lower. If applicable, plan sponsors may be able to choose a different share class if certain criteria are met, in which case charges and performance will differ.

Prospectuses for the mutual fund investor options in your plan are available by calling the Participant Services Center. Please call the phone number listed on your quarterly statement.

Metl ife and/or its affiliates receive fees from the mutual fund families and/or their affiliates for providing certain administrative distribution and/or recordkeening services

'Alpha is a measure of the difference between a portfolio's actual returns and its expected returns, given its level of market risk, which is known as beta. A positive alpha indicates the portfolio has performed better than predicted, given its level of market risk(beta). A negative alpha indicates a portfolio has underperformed, given the expectations established by the fund's market risk exposure. Alpha may be useful in analyzing a manager's ability to add value on a risk adjusted basis to a portfolio's performance. "Beta is a means of measuring the volatility of a security in comparison with the market as a whole. A beta of 1 indicates that the security's price will move with the market. A beta of nore or less than findicates that the security's price will be more or less volatile, respectively, than the market. "Standard Deviation measures the performance volatility of an investment against itself – that is, how much the investment goes up or down. The larger the standard deviation, the more likely the investment may experience a return that is far more or far less than its average.
